*Let's work together
to make
a world in which
many worlds fit!*

Free UniversEity—Fall 2012

What is this?

This is a calendar, map, and listing of various subjects available for study and practice, **for free**, with others in our growing community.

—Free U is the idea that *we can all learn with and from each other everything that we need to know in order to survive and thrive as community.*

—Free U already exists everywhere all the time inasmuch as the above statement is true.

—Free UniversEity is the title of a particular project that is meant to serve as a place for people to connect who resonate with the idea of Free U.

The Free UniversEity is an intentional networking effort with the focus of manifesting the idea of Free U. Through participating, you will: **1)** participate in growing a gift economy/mutual aid network where we will ensure all of us have all that we need based on the principles of community and sharing **2)** participate in growing systems of survival and self determination that are immune to the failures of centralized economic planning **3)** contribute to the deepening of our collective knowledge **4)** transform the Free UniversEity

What's this got to do with me?

With an education system that is not directly controlled by the people, and which funnels us into a job-market even less controlled by the people, our livelihoods are in constant jeopardy. In the absence of alternatives to education and the job market, we must take action ourselves if we want to live and be free. This project directly concerns all those interested in a world free from all oppressions. This should be particularly attractive to all those who are unsatisfied with relying on colonized and corporatized food systems, medical care, schooling, transportation and housing industries as well as to those who are generally disgusted with the current situation on planet Earth. In the face of a world tending toward permanent warfare and incarceration, we must act collectively and concertedly in order to manifest something different. Although the violence and degree of challenges we face are great, we can be greater still. Those who wish to challenge the fascist and dystopian scenarios facing us at the present moment are called on to work together to create something we can all agree on: a world in which many worlds fit.

How does it work?

The following pages contain a list of subject areas (including brief descriptions), a calendar with all of the subject areas assigned regular weekly meetup times, a map of various meetup locations throughout the greater Seattle area, and instructions for finding and creating the learning spaces you are interested in.

Folks should peruse the subject listing to find if anything they would personally like to focus on is already listed there. Once you have taken note of everything that interests you, find those subjects on the calendar to see which meetups fit your schedule.

From there, follow the instructions on the map and the following page for how to find your meetup and suggestions for helping everyone's experiences go well. If you find that you are interested in focusing on something that does not make sense in any of the existing categories, try attending one of the "Open" spots on Fridays and/or email FreeUniversEity@gmail.com

SUBJECT LISTING FOR AUTUMN 2012 LAUNCH OF FREE U

Archery (ARCH): Ever want to learn to shoot a bow and arrow? Already know how? Know a good place to get some hay? A nice field? Let's get together and have some target practice!

Being chat (BC): Think you know a thing or two about existence? Don't have a clue about anything? Whether it's spirituality or straight materialism, existence is here at least as long as we are and it couldn't hurt to talk about it!

Climbing (CLMB): The ground is such a boring place.

Collecting Water (COLW): Ever wonder where that clear liquid stuff delivered by pipes comes from? Let's get together water!

Communications (COMM): Whether we are talking fancy speeches or how to set boundaries, communication is everything. How do we do it? How can we do it better?

Dance (DAN): Sometimes humans like to get together and dance.

Electronics (ELEC): Like computers? X-Boxes? Robots? Fixing electrical problems in your own house?

EPMIC (Education-Prison-Military-Industrial Complex): Ever wonder why some people go to prison and die in wars while others get fancy jobs sending people to die in prison and wars? Us too! Let's try and figure it out!!!

Film making (FILM): One crucial mode of storytelling, no matter the genre. It will serve for all of us interested in this form to gather and freely share knowledge, resources, and efforts.

Food prep (FOOD): Get together and help prep food to be shared with the community for free.

Food 4 Everyone (F4E): Ever go hungry and wish there was somewhere you could go to share food and community with others, free of monetary transactions? There is!

Free Store-ing (FREE): All this free stuff in all these different places...let's bring it all together for a *rea*/gift shop! Bring what you have to give and get what you need for free.

Game Nights (GAME): (Don't) like to run around? Let's figure it out.

Freestyle arts (FART): Whatever art may be to you, let's get together, share, & practice our arts and see what happens!

Gardening (GRDN): Someone's got to grow the food. May as well be us if we want to be less subject to starvation in times of food shortage. Besides, food is medicine and plants are lovely. Get outside and dig in the dirt with the neighbors!

Geographies (GEO): Although it started as a colonial/military discipline to maximize wartime and extractive economic advantages, surely some good can be had with our studies?

General Assembly (GA): People who live, work, eat, sleep, die and poop on the same planet should occasionally assemble and discuss/plot their common fate. That's what this is for.

Housing (HOUS): Where do you live? Not your address, but where? Is it nice? Would you like it to be? Let's figure this out...

Internets (INTS): How does the internet work? Where did it come from? How can we use it in ways that maximize our capacities for massive direct horizontal organizing? How can we make sure that we can always maintain our access to the internet in the case of emergency?

Human Law (HURL): Love it or hate it, it is certainly powerful stuff is working in the Legal system. And it can be highly beneficial to carry knowledge of. From know-your rights to represent-yourself and your friends in court, communities that speak for themselves kick ass.

Language study (LANG): Why is this all in English? That's limiting...

Mad Scientist-ing (MDSC): Consider yourself an inventor? Fancy the 'hard sciences'? Just like tinkering with things and/or investigating how stuff works? Sounds good to us...

Making clothes (CLOTH): Where do your clothes come from? You know it's actually really awesome to craft clothes?

Martial Arts (MA): Whatever your flavor of martial prowess or your interest, we can all benefit from sharing this stuff.

Medicine (MDCN): What is health? How do we know when we are well or not well? How do we get well when we know we are not well? Food is medicine. So is learning about medicine.

Mechanics (MECH): What to do when stuff stops working? Do you know your way around under the hood of a car? With appliances? Would you like to? Can you show us?

Move bloc (MOVE): How do you like to get around? Move in the world? Bicycle? Roller blades? Unicycle? Skateboard? Let's get together and share strategies and styles of mobility!

Music (MUS): Like to play music? Guitar? Piano? Washboard? Banjo? Poetry? Beat box? Spit bars? Rad. Let's get down.

Mycology (MYC): Like mushrooms? Know a fungi? Want to meet one? Let's get together to share and expand our experiences of the fungal kingdom!

Northwest plants (NWPL): What do you know about it?

Photography (PHOT): You know, "snap snap."

Publishing (PUB): Ever wanted to publish your own materials? Already an expert at doing so? Let's get together!

Radio (RAD): Skills and projects sharing related to radio(s).

Reading (READ): Let's read together!

Sharing Water (SW): How do we get water from one place to another in times of scarcity? Would be good to know...

Staying (in)sane (STIS): What does sanity mean in an insane world? How do we hang onto it? Do we even want to? Either way, how can we make sure we are healthy enough mentally to feel competent in directing our own lives?

Story Time (STRY): Time to share all manner of stories!

Theater (THE): You know, like...acting and stuff.

Understanding Water (UWAT): What is the difference between water and H₂O? Is there one? What is this stuff?

Yoga (YOGA): Yoga means union. This is more than just stretching.

The scene features a large, ornate building with a green dome and minaret-like structures. In the foreground, there are colorful boats on a body of water. The sky is filled with floating, multi-tiered platforms and structures, suggesting a high-tech or magical environment. The overall atmosphere is bright and colorful, with a clear blue sky and lush greenery.

What to expect at your meetup:

This is a highly decentralized and do-it-yourself project with very little centralized support. By the time you arrive, there will either be other people already gathering under or near a sign that names the subject or there will be supplies you can use to make a sign. If you arrive and there is still not anyone advertising that they are there for the meetup, pick up the signmaking materials and get to it! Once you or someone else has successfully constructed a beacon letting folks know why you are there, you can all begin to gather. If you are joining a meetup that is being newly formed, you will need to work together to develop the specific focus, based on the particular and common interests of everyone present, of your continued time together. If this particular meetup is already well developed, the folks involved can share their experiences, intentions and forms. In any case, you will need to all figure it out as a meetup.
